

Discovery and Analysis

Understanding the dependencies between services, applications and infrastructure is critical to delivering successful transformation programmes, vulnerability assessments and Service Management. Without this key information, future improvements are hindered.

Regardless of the project size, Technimove take time to understand the organisations current issues and future needs, enabling them to offer tailored, flexible and scalable solutions.

Through a combination of physical and virtual Audits, workshops and automated tooling, Technimove will Audit and asses your current environment ensuring a comprehensive understanding of the business services, applications, technology estate and their dependencies. With this approach, we provide a complete view of the I.T. estate, identifying gaps and/or risks, enabling us to provide market leading recommendations, realising savings and future improvements.

What sets us apart?

- Process: Our project managed approach reduces risk with clearly defined SLA's & deliverables.
- People: Our engineers are highly skilled and experienced; they possess a wide spectrum of technical competencies and certifications.

Why Choose Us?

We work with technology leaders and partners to devise solutions that meet company objectives, reduce disruption, and save cost. And build-in scalability to future proof your network.

- 22 years' experience in delivering digital transformation and networking projects.
- Proven capabilities with 5000+ successful projects covering a whole range of transformation services.
- We use the ITIL V3, IT service management approach to deliver our solutions.
