

Resourcing

Technimove's flexible resourcing service allows you to remain focussed on delivering existing business operations by ensuring that you are covered by a highly qualified, technical and experienced ICT team whenever you need us.

Most of our clients find that they need additional support for their highly skilled IT professionals at crunch times. Our bespoke flexible resourcing service provides you with skilled, experienced and knowledgeable professionals who are on hand to support your IT team and free them up whenever necessary.

The service is quick and flexible – we can provide experienced professionals on-site often within a day or two. This allows our clients to meet immediate short and long-term projects, even when the need hasn't been anticipated in advance, such as a key member of staff falling ill. As well as being able to provide staff swiftly, we can also stand them down at a day's notice if required.

We have considerable experience ranging from 24/7 helpdesk support and engineering to technical specialists and subject matter experts. Technimove can support our clients with business service assurance, operational readiness and service availability across technical support and engineering services, covering backup, moves or migrating servers, services and applications.

Why Choose Us?

The only thing we know better than delivering digital transformation is the people delivering it.

- **Delivery assurance**
- **Highly qualified staff**
- **Diverse Skill Pool**
- **22 years' experience**
