

## Business Readiness Consulting

Our Business Readiness solutions provide a systematic, independent, and documented process that will help all the stakeholders and decision-makers map, evaluate, and identify points of vulnerability while identifying areas ripe for optimisation.

We help companies make the most of their IT estate, which means you can assure service delivery to your internal teams and clients no matter what the demands.

The Service following key areas:

### 1. Network Readiness Check

Our Networking services team provides a complete, end-to-end solution. From consultation and design to implementation, configuration, and ongoing management.

From the simple reconfiguration of a single device through to the design, delivery, and support of large complex enterprise environments, we cover all your networking needs.

#### Service Coverage

- Auditing and testing
- Design and consultation
- Installations and relocations
- Commissioning and implementation
- Ongoing support

### 2. Infrastructure Services

The service ranges from analysis, consultation and design, to configuration, delivery, and ongoing management of IT infrastructure that enhance and extend our client's operations, and ensure that the platform is fit for purpose to cater for current and future demands.

We develop practical solutions to overcome complex problems encompassing people, process and technology. We define our client's overall transformation strategy, working to shape a plan of action designed to deliver on long term and overall business objectives.

#### Service Coverage

We offer full range, cross platform delivery of:

- Compute (Server, Blade)
- Storage (SAN, NAS, DAS)
- Virtualization (VMware, Hyper-V)
- Server Operating Systems (Windows, Linux)
- Virtual Desktop Infrastructure (Citrix, RDS)
- Installation & Commissioning
- Automation & Orchestration
- Updates & Maintenance
- Backup & Recovery
- Business Continuity & Disaster Recovery
